OBJECTIVE

Motivated Computer Science Under graduate seeking an entry-level Software Developer role, with a strong foundation in programming, problem-solving, and web technologies. Passionate about building scalable applications, learning modern tech stacks, and applying theoretical knowledge to real-world projects. Eager to contribute to a dynamic development team while continuously improving technical and professional skills.

EDUCATION

Eluru College of Engineering, BTech in Computer Science and Data Science. 2022 - 2026

CGPA : 8.1/10

Relevant Coursework: Data Science, Fundamentals of DS, Programming, Web technologies.

Sri Chaitanya Junior College, MPC 2020 - 2022

CGPA : 9.3/10

Relevant Coursework: Mathematics, Physics, Chemistry, English.

SKILLS

Languages	Python
Web Development	HTML, CSS, JavaScript, ReactJS
DataBase	MySQL
Tools	Git, GitHub, Postman, VS Code
Soft Skills	Creative Thinking, Content Strategy, Communication, Team Collaboration

PROJECTS

Product Store App The Product Store App from Scratch is a MERN Stack Application Which is used to Add, Update, View and Delete Products. It Comes With Switch Mode Functionality i.e., Dark Mode and Light Mode.

- Tools Used: MongoDB, ExpressJS, ReactJs, NodeJS.

Emotion Detector App Built a Real-time Emotion Detection tool using webcam feed. It recognizes human facial expressions and displays the detected emotion along with confidence levels using percentage bars.

- Tools used: Python, OpenCV, TensorFlow, Mini-XCEPTION Model

Contacts Store App Built a full-stack web application From Scratch that allows users to securely register and log in to manage their personal contact lists. Implemented complete CRUD operations for contacts along with a dark/light mode toggle for enhanced user experience.

- Tools used: MongoDB, Express.js, React.js, Node.js (MERN Stack)

EXTRA-CURRICULAR ACTIVITIES

Tech Content Creator — Instagram ([@u_day_codes](#))

- Created 150+ educational coding reels in Telugu, building a community of 30K+ followers.
- Explained core concepts of HTML, Python, and AI using simple, beginner-friendly examples.
- Improved communication and problem-solving skills by breaking down complex technical topics.

My Blog — [udaycodes.in](#)

- Built and actively maintain a personal tech blog focused on coding tutorials and AI topics.
- Publish structured explanations and practical examples to support learners beyond short-form content.
- Gained hands-on experience with content structuring, technical writing, and web fundamentals.
